

STAY AHEAD OF THE CURVE

**BECOME A GREENROADS SUSTAINABLE
TRANSPORTATION PROFESSIONAL TODAY!**

-  Promote green transportation
-  Build support for sustainable infrastructure
-  Manage and deliver successful Greenroads Projects

WHO SHOULD BE AN STP?

Greenroads Sustainable Transportation Professionals (STPs) are individuals with a comprehensive understanding of sustainable transportation.

- 🌱 Engineers and designers
- 🌱 Contractors, suppliers, and project managers
- 🌱 Public works agency representatives
- 🌱 Communications professionals promoting sustainability
- 🌱 Sustainability consultants and specialists
- 🌱 Students
- 🌱 Anyone working on a Greenroads Project

BENEFITS OF BEING AN STP

EXPERIENCE

Earn points for your Greenroads project team

EXPERTISE

Gain specialized knowledge in sustainable transportation

CREDIBILITY

Test and grow your knowledge of sustainability

LEADERSHIP

Differentiate yourself from your peers

NETWORKING

Connect with other STPs around the world

RECOGNITION

Establish yourself as a sustainability expert

HOW DOES THE STP CREDENTIAL WORK?

Our STP credential is useful for those working — or wishing to work — in the field of sustainable transportation. More than 80 percent of Greenroads projects have an STP leading the way.

STP BADGE LEVELS

Invitation-only — registered Greenroads Project experience — written assessment on project development and delivery — participation in a project field audit

BENEFITS

Earn points on Greenroads Project — manage Registered Projects from start to finish

Upcoming courses can be found at greenroads.org/events

STP STORIES

"As one of the first 25 professionals in the world to obtain the Greenroads STP credential, this knowledge has helped me spread the word that a rating system exists that is easy to use and that there are many aspects where we can apply concepts and actions to end up with more sustainable infrastructure."

René A. Vidales

Watershed Protection Program, County of San Diego

"I became an STP so that I could gain the competency and skills required to successfully carry out the Greenroads certification on our project. I'm passionate about sustainability and looking to further embed these practices into our company culture."

Iveshan Lauten

Environmental Advisor, CPB Contractors

"After being involved with the Bagby Street Greenroads project, I felt the need to not only 'walk the walk' in regards to sustainable transportation, but also 'talk the talk'. Getting my Level 2 STP badge allows others to see my commitment to sustainability, I'm proud to be a Greenroads STP!"

Beth Bryan

Senior Associate, Walter P Moore

"The process of becoming a Level 3 STP gave me insight into managing the complex set of issues that come up when designing and constructing sustainable transportation projects. It has expanded my knowledge base and increased my confidence in working on future Greenroads projects."

Kurt Wiseman

Design Engineer, Pertee
