

# JOIN US FOR BOOTCAMP

## GREENROADS 101: Background, Business Case and Project Success

### Join Us for a Half Day Seminar on Greenroads, the Premier Sustainability Rating System for Transportation

Greenroads International is an independent non-profit organization dedicated to fundamentally changing the way transportation projects are built on a global scale. We are focused on sustainable transportation education and helping teams build greener projects.

The Greenroads® Rating System is a collection of points-based performance measures that help quantify and communicate sustainable strategies and benefits on transportation projects. Greenroads is being used on more than 100 projects by owner agencies, designers, contractors, suppliers and academia around the world.

Bootcamp covers the basics of sustainable transportation, and how Greenroads works through examples and group activities. Participants will be better prepared to earn Greenroads Sustainable Transportation Professional (STP) credentials.

Sustainable transportation earns points with your community, your organization, and your résumé.

- Design and build Greenroads projects
- Learn what sustainability success looks like
- Increase your “street cred”
- Stay competitive
- Earn credit for professional development
- Prepare for Level 1 and Level 2 STP Exams
